UNUSUAL HOMES AROUND THE WORLD

A

KERET HOUSE

No other house is as narrow as this one! A Polish architect living in the capital, Warsaw, walked past the empty site between a house and an apartment building on his way home and decided to develop it. It's the least suitable house for families, but someone living alone should find it easier.

B

CROSSWAY

Situated in beautiful countryside, this prize-winning modern home was designed by architect, Richard Hawkes, who lives there with his family. It is one of the first 'passive houses' in the UK and uses energy from the sun to produce all its electricity. Local materials were used to build it and it has a living 'green' roof.

C

HOUSE NA

The firm of architects who built this house had an unusual starting point, creatures who lived in trees long ago! They imagined them being able to move from one branch to another and communicate easily. These original thoughts produced a modern house made of glass in a quiet neighbourhood in Japan's capital.

D

FRESTON TOWER

This historic tower has lasted 400 years. There are six floors with a single room on each. From the top, you can see the river and the fields beyond. If four adults share the cost, it is cheaper than £25 a night to stay here. That's less expensive than some youth hostels!

Environmental Awareness Day

A Plumpton High School

This school decided to arrange a variety of activities, some aimed at achieving a better understanding of environmental problems, and others designed to be of practical help. For instance, the school magazine brought out a special edition on the subject, full of articles and stories where pupils expressed their feelings about the threats facing our environment. In another attempt to find out for themselves how serious these threats really are, the pupils decided to study the problem of pollution by making a survey, run by the science department, into air pollution in the local shopping centre. The school also held a sponsored walk and handed over nearly £1000 to the World Wide Fund for Nature. Pupils prepared a campaign to ban cars from the city centre and reduce traffic congestion. They gained a lot of publicity for the school by cycling through the city and handing out brochures about the benefits of cycling and walking.

CLASSROOMS *around the* WORLD

CARTER I wasn't sure what to do in the summer after I left school and before I went to university. I was looking for ideas, and then I found out by accident about the teaching programme for Fiji. I was able to apply because I had had experience of working with children before. So I went to the Fijian island of Nacula for three months. Our classroom was fairly ordinary, with desks and a blackboard. There were hardly any computers, but the walls were covered with colourful pictures and writing, mostly in English. I spent an amazing three weeks at the school helping the class teacher. The teacher had the most beautiful wooden desk that her grandfather had made for her by hand to celebrate her first job. It was a very different school to the one that I had attended back home. I thought that the children all worked really hard and they mostly did well.

WORK EXPERIENCE

TASTER FORTNIGHTS WITH LOCAL BUSINESSES

CRUISE SHIP

Our company is important for tourism because it provides cruises worldwide. When ships are in port, we get them cleaned and make sure cabins are ready for new passengers. You will spend 40% of your time on board helping our staff with cleaning and general repairs, and also work in the office on a busy customer service desk.

RIDING SCHOOL

You'll look after one particular horse while you're here, dealing with everything from its food to its appearance and daily exercise routine. Although your work will be mostly in the fresh air, you'll be at a desk for brief periods, in order to answer phones and arrange customers' lessons.

CITY MUSEUM

While you don't have to know about local history, we do expect you to put your internet skills to good use! Find out interesting facts about the objects on display, which you can then pass on to kids and their parents as you guide them around the building. Many of these visitors come from other countries.
